## Reimbursement Agreement

### 34. Peer Review Reimbursement Agreement

THIS AGREEMENT made in duplicate this \_\_\_\_ day of \_\_\_\_\_, 20

BETWEEN:

---

Hereinafter called the 'APPLICANT'  
OF THE FIRST PART

AND

**THE CORPORATION OF THE COUNTY OF GREY**  
Hereinafter called the 'CORPORATION'  
OF THE SECOND PART

WHEREAS the Applicant has submitted development applications(s) (i.e. plan of subdivision/condominium, County Official Plan Amendment) and supporting studies to the Corporation for approval, and;

WHEREAS the Corporation by virtue thereof will require the assistance of peer review consultants, solicitor and other professional advisors to provide input and advice to the Corporation with respect to the development proposal and related studies;

NOW THEREFORE BE IT RESOLVED that in consideration of mutual covenants hereinafter set out, the parties hereto agree as follows:

- i. The Applicant represents and warrants that they are requesting development approvals on the lands hereinafter described on Schedule 'A' attached hereto. The Applicant represents and warrants that it is intended that the proposal shall closely approximate the application as attached in Schedule 'B' attached hereto.
- ii. The parties hereto acknowledge that the proposal indicated on Schedule 'B' hereto may not be the final version herein and amendments or modifications may be required thereto as the process proceeds.
- iii. The Applicant covenants and agrees to pay the Corporation all related costs for professional help incurred by the Corporation. Without limited in the generality of the foregoing, the Applicant covenants and agrees to an immediate security deposit of Five Thousand Dollars (\$5,000.00) against the anticipated costs (hereinafter referred to as the 'Deposit'). At any time that the balance of the Deposit falls below \$500.00, and upon request of the Treasurer, sufficient funds to increase the balance of the Corporation shall produce to the Applicant invoices that have been paid with respect that the amount of these invoices be matched by the Applicant forthwith. Should the deposit at any time fall below \$0.00, the file(s) shall be held in abeyance by the County and no further action will occur until sufficient

funds are deposited by the Applicant to return the deposit to the \$5,000.00 level.

<p>Sensitive surface water features and sensitive groundwater features</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<p>Development and site alteration are restricted in or near sensitive surface water features and sensitive groundwater features.                  Demonstrate suitable mitigation measures and/or alternative development approaches to protect, improve or restore sensitive surface water features, sensitive groundwater features and their hydrologic functions.</p>
<p>Water Quality and quantity</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<p>An assessment is generally required to determine potential impacts of development proposals on water quality and quantity.                  If the proposal is adjacent to a water body such as a lake or stream, wetland, spring or groundwater recharge area, an impact assessment on the water body may be needed.                  As well, in areas of high water table, fractured bedrock or thin overburden, a Hydrogeological report may be required in accordance with the Ministry of Environment (MOE) D-Series Guidelines.                  (These are not the only instances when a technical study may be needed).                  Development adjacent to a lake trout lake must address other requirements. Consult with the Ministry of Municipal Affairs and Housing early in the planning process.                  The province has particular interests in lake trout lakes.</p>

<p>Natural Hazards</p>	<input type="checkbox"/>	<input type="checkbox"/>	<p>Development should generally be directed to areas outside of hazardous lands and hazardous sites.</p> <p>Is the proposal within:                  A dynamic beach hazard?                  The defined portions of the one hundred year flood level along the connecting channels of the Great Lakes?                  Areas that would be inaccessible as a result of flooding, erosion or dynamic beach hazards and a floodway?                  Is the proposal subject to limited exceptions such as:                  Safe access appropriate for the nature of the development and the natural hazard?                  Special Policy Area?                  Uses which by their nature must be located in the floodway?</p> <p>Where development is permitted in portions of hazardous lands and hazardous sites not subject to the above prohibitions, flood-proofing, protection works standards and access standards must be adhered to. In addition, vehicles and people need to have a way to safely enter and exit the area, hazards cannot be created or aggravated and there can be no adverse environmental impacts.</p> <p>Is the subject land within or partially within:                  Hazardous lands adjacent to the shorelines of the Great-Lakes and large inland lakes (includes flooding, erosion and dynamic beach hazards)?                  Hazardous lands adjacent to river, stream and small inland lake systems (includes flooding and erosion hazards)?                  Hazardous sites (includes unstable soils and unstable bedrock)?</p>

				<p>A special policy area shown in an approved official plan?                  The food fringe in an area subject to the two zone concept of floodplain management?                  If the proposal is in a hazardous area, demonstrate how the hazards will be avoided, or where appropriate, addressed through standards and procedures such as flood-proofing and protection works.</p>
<p>Human-made hazards<sup>4</sup>                  including mine hazards                  and high forest fire                  hazards</p>	<input type="checkbox"/>	<input type="checkbox"/>		<p>Development proposed on abutting or adjacent to lands affected by: mine hazards; oil, gas and salt hazards; or former mineral mining operations, mineral aggregate operations or petroleum resource operations, may be permitted only if rehabilitation measures to address and mitigate known or suspected hazards are under-way or have been completed. Are the subject lands on or within 75 m of existing un-decommissioned oil and gas works?                  Are the subject lands on or within 1000 m of a salt solution mining well? Demonstrate how the hazard(s) will be addressed.</p>
<p>Contaminated sites</p>	<input type="checkbox"/>	<input type="checkbox"/>		<p>To determine potential soil contamination, proponents must complete a Phase 1 Environmental Site Assessment (ESA) as per the Ministry of Environment regulation. A Phase 2 Environmental Site Assessment would be needed if the site has potential for soil contamination.                  Remediation of contaminated sites shall be undertaken, as necessary, prior to any activity on the site(s) associated with any proposed new sensitive use such that there will be no adverse effects.</p>

**Notes:**

- Class 1 Industry** – small scale, self-contained plant, no outside storage, low probability of fugitive emissions and daytime operations only.
- Class 2 Industry** – medium scale processing and manufacturing with outdoor storage, periodic output of emissions, shift operations and daytime truck traffic.
- Class 3 Industry** – indicate if within 1000 metres; processing and manufacturing with frequent and intense off-site impacts and a high probability of fugitive emissions.
- Hazardous Sites** – property or lands that could be unsafe for development or alteration due to a naturally occurring hazard(s). These hazards may include unstable soils (sensitive marine clays – Leda, organic soils) or unstable bedrock (Karst topography)
- Crown Lands** - Certain areas are identified by MNR as being of special interests, such as lake access points.
- Table A Distances** - quoted are approximate and are intended for your guidance in assessing your application.
